PROJECTS EXPERIENCE

- **React and Node js Forum QA**

  Forum Platform Question & Answers created using React and Node js.
  Users of this site can:
  - Ask questions and find answers
  - Down vote and up vote replies and questions
  - Edit own profiles

  Admins of this site can:
  - Create categories
  - Ban users
  - Remove inappropriate questions and answers

- **Data Analytics Team Project — EPAM Company (Educational Program)**

  Data pipeline from raw data in Azure SQL database to report in Power BI.
  During this project I:
  - Worked in a team of data analytics students on a real-world study project
  - Collaborated with team members using Jira and task-based workflow
  - Participated in data analysis, data preparation, and result discussions
  - Gained experience working in a company-like environment with deadlines

- **Django Ecommerce Site**
  https://github.com/AADmitriy/django-ecommerce-site

  Django ecommerce site with this features:
  - Working paypal and stripe payment systems
  - Account system
  - User email verification
  - Products filter
  - REST API for products information
  - webp django tag which converts images to webp format for optimization
  - In development mode, the site automatically downloads products information from dummyjson.com if there is no data
